## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 7 – 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 7 recites the limitation “0.01 at ppm to 3 at% of C with respect to the amount of the first element”. This is not described in the specification. The specification describes 3 at ppm to 3 at% of C in column 7, line 29. The claim is broader than what is disclosed in the specification. Claims 8 – 22 are all directly or indirectly dependent on claim 7.

Claim 23 recites the limitation “0.01 at ppm to 7.5 at% of H with respect to the amount of the first element”. The specification describes “500 wt ppm or below” in column 8, lines 1 – 3, which is the passage that the Applicant identifies as supplying support in the specification for the subject matter of claim 23. This passage does not supply adequate support for this claim limitation. The claim is broader than what is

disclosed in the specification. Claims 24 – 32 are either directly or indirectly dependent on claim 23.
